

Make room for innovation with Retail Connected

Challenge

The retail sector is changing each and every day. Retailers must implement an effective omni-channel strategy in order to be successful and create a shopping experience.

Stop putting out fires

Retailers want to quickly respond to the developments they encounter. However, IT departments often have to deal with a wide range of systems as well as the accompanying maintenance. This means there is little room to exploit new developments.

- Merchandising
- Supply Chain Management
- Customer Engagement
- Sales
- Finance
- Employee Engagement
- Analytics

connected

Our solution

Retail Connected is a Seamless Retail Solution based on the Microsoft platform. We will minimise the workload of your organisation because our implementation process is based on best practices. All solutions operate in a cloud, which means you can easily scale up and scale down, while only paying for what you need.

The advantages

A stable and up-to-date IT landscape which ensures:

- Predictable performance, fast roll-out and flexible IT
- Shorter time-to-market
- IT department no longer spends time putting out fires
- Data is used proactively

Retail Connected offers you a stable and up-to-date IT landscape, so your employees can focus on what is most important - helping customers.
